

Impact Factor Trend Graph: ASIAN-AUSTRALASIAN JOURNAL OF ANIMAL SCIENCES

Click on the "Return to Journal" button to view the full journal information.

**Impact Factor -- see below for calculations*

The journal impact factor is a measure of the frequency with which the "average article" in a journal has been cited in a particular year. The impact factor will help you evaluate a journal's relative importance, especially when you compare it to others in the same field. For more bibliometric data and information on this and other journal titles click on the "Return to Journal" button.

NOTE: Title changes and coverage changes may result in no impact factor for one or more years in the above graph.

2013 Impact Factor

Calculation: Cites to recent articles 250 = 0.563
Number of recent articles 444

2012 Impact Factor

Calculation: Cites to recent articles 277 = 0.643
 Number of recent articles 431

2011 Impact Factor

Calculation: Cites to recent articles 253 = **0.579**
Number of recent articles 437

2010 Impact Factor

Calculation: Cites to recent articles 230 = **0.487**
Number of recent articles 472
